

HOW TO PRINT YOUR NATURE DIARY

The pages in this booklet are arranged in an order so that, when printed, every page sits where it needs to be. This might look confusing, but you will notice that it'll work out fine.

If your printer can print two-sided, follow the steps below:

- Select the "Print on both sides" option
- Make sure to select "Flip on short edge"

If your printer can't print two-sided, follow the steps below:

- Print all pages first(select "print odd pages only")
- Put the printed pages back into the paper feed (make sure they're the right way around!)
- Select "print even pages only"
- Make sure you select "Reverse pages"

If you're not sure how this works, you can also download and print the document with single pages on our website.
