

Build a hibernaculum

Great for amphibians and reptiles!

wildlife
watch

You will need:

- Spade

- Logs and branches

- Rocks and bricks

- 2-3 drainpipe off-cuts or cement pipes

If using plastic drainpipes, roughen the insides with sandpaper so that they are not too slippery for animals to climb

- Turf or meadow flower seeds (optional)

- 1 In a sunny spot, dig a hole about 50cm deep and 1.5 metres across.

- 2 Fill with logs, branches, bricks and rocks, leaving plenty of gaps in between.

- 3 Insert entrance tubes (drainpipes) at ground level into the pile.

- 4 Cover the pile with soil (to about 50cm high).

- 5 You can plant meadow seeds or turf over the mound.
